

Globalance Sokrates Fund

US Markets Rise, Europe Weakens

The US stock markets continued their record chase driven by large IT companies, further widening the gap with European stock indices. General economic uncertainty, prompted by political instability in Europe, particularly the announcement of early parliamentary elections in France, weighed on investor confidence. The Globalance Sokrates Fund was able to close the reporting month with a positive result, mainly thanks to positive performance contributions from the Globalance equity selection and real estate investments.

Investment strategy

The Globalance Sokrates Fund invests (in a BVV2-compliant manner) in a dynamically managed combination of broadly diversified asset classes including shares, bonds, real values such as real estate or low-correlated investments, such as insurance-link securities or premium strategies. The investment strategy allows a tactical weighting of the asset classes depending on the market assessment. Based on this weighting, Sokrates then invests in individual assets and investment funds with a positive footprint and a low impact on climate change. Investors benefit here from the broad diversification of the asset classes, from the market potential of future oriented asset sectors and the positive effect of the assets.

Statistics (Performance and risk on June 30, 2024)

Performance month of June	0.9%	Annualized performance since 1.1.12	2.5%
Performance year to date	6.1%	Annualized volatility	6.8%
Sharpe Ratio	0.4		

5 reasons for the Globalance Sokrates fund

- + broadly diversified investment strategy for long-term growth for your investment assets, pension plan assets or foundation assets
- + Footprint Report shows the fund's alignment with a sustainable economy, society and environment
- + investment selection criteria with a view to megatrends that hold great potential, such as digitisation, new mobility or urbanisation
- + fewer risks thanks to compliance with the 2 °C climate target of the Paris Agreement
- + dynamic control of the asset classes for an optimisation of both returns and risks, depending on the market

Footprint

The impact of Globalance Sokrates Fund on the economy, society and the environment

View the fund's footprint [here](#)

The footprint of this portfolio is positive

The Globalance Footprint® shows what our investors assets around the world are doing - individually and at a glance. Our grid is simple and objective. We assess the contribution to economic prosperity, the sustainability of society and the preservation of our natural resources on the basis of nine themes.

Explanation: 0 % of invested capital has an adverse footprint, 15 % of invested capital has a balanced footprint and 85 % of invested capital has a positive footprint. Each of the nine dimensions is evaluated on a scale of 0 - 100 and assigned a weight. The Footprint total value is calculated by adding the weighted scores of the individual dimensions.

The effect of the portfolio

Increasing weather extremes, the melting of the polar ice caps and other consequences can be directly linked to global warming. The climate crisis has an impact on wealth and vice versa. The principles of sustainability are the foundations for a livable society and a healthy environment. Integrating sustainability into a portfolio increases the resilience and potential of assets.

The warming potential in a global context

To put the warming potential in perspective, we show the possible global emissions pathways to 2100 (chart). These were created by Climate Action Tracker and show different scenarios ranging from current political projections to short-term country pledges (until 2030) and long-term country pledges (until 2050).

Globalance Footprint

The Globalance Footprint shows what assets do in the world - in the areas of economy, society and environment. Whether shares, real estate or tangible assets: We make a systematic assessment of the impact of all investments. Our grid is simple and objective. A total of nine criteria represent sustainable foundations for prosperity, the future viability of society and the preservation of our natural life-support systems. The Footprint is positive if the value is greater than 54.
